IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A method of printing information comprising ~~the steps of~~:

transmitting information to be printed from a <u>handheld</u> computing device over a wireless connection <u>to an Internet service provider</u>;

receiving, <u>through the Internet service provider and</u> by a wide area network, the information to be printed which was transmitted over the wireless connection;

forwarding the information to be printed over the wide area network to a printer; and

printing the forwarded information using the printer.

Claim 2 (Currently Amended): The method according to claim 1, further comprising ~~the step of~~:

generating the information to be printed prior to transmission thereof.

Claim 3 (Currently Amended): The method according to claim 2, wherein the wide area network is the Internet and the generating ~~step~~ comprises ~~the step of~~:

browsing the Internet for the information to be printed.

Claim 4 (Currently Amended): The method according to claim 3, wherein the browsing ~~step~~ comprises ~~the step of~~:

shopping on the Internet.

Claim 5 (Currently Amended): The method according to claim 2, wherein the generating ~~step~~ comprises ~~the step of~~:

generating the information to be printed using an e-mail program.

Claim 6 (Currently Amended): The method according to claim 1, wherein the forwarding ~~step~~ includes ~~the step of~~:

controlling the printing using the Internet printing protocol (IPP).

Claim 7 (Currently Amended): The method according to claim 1, wherein [[a]] the wireless mobile device is configured to transmit the information and the transmitting ~~step~~ includes ~~the step of~~ transmitting the information to be printed in response to a single user command.

Claim 8 (Currently Amended): The method according to claim 1, wherein the transmitting ~~step~~ comprises ~~the step of~~ selecting the printer connected to the ~~WAN~~ wide area network in which to print to.

Claim 9 (Currently Amended): A system for printing information, comprising:

a wireless handheld mobile device configured to transmit, over a wireless connection, information to be printed to an Internet service provider;

a wide area network configured to receive the information from the Internet service provider and to forward the information to a printer configured to print the forwarded information.

Claim 10 (Original): The system according to claim 9, wherein the wireless mobile device is configured to generate the information to be printed prior to transmission thereof.

Claim 11 (Original): The system according to claim 10, wherein the wide area network is the Internet and the wireless mobile device is configured to browse the Internet for the information to be printed.

Claim 12 (Original): The system according to claim 11, wherein the wireless mobile device is configured to enable a user to shop on the Internet.

Claim 13 (Original): The system according to claim 10, wherein the wireless mobile device is configured to generate the information to be printed using an e-mail program.

Claim 14 (Original): The system according to claim 9, wherein the wide area network is configured to control the printing using the Internet printing protocol (IPP).

Claim 15 (Original): The system according to claim 9, wherein the wireless mobile device is configured to transmit the information to be printed in response to a single user command.

Claim 16 (Currently Amended): The system according to claim 9, wherein the wireless mobile device is configured such that a user can select the printer connected to the ~~WAN~~ wide area network in which to print to.
